

SWBNO Transmission Main Project

NOTICE OF SERVICE DISRUPTION

**** WATER ****

You may experience low or no water pressure in this area.

During this time, please find an alternative water supply.

Sewerage and Water Board of New Orleans (SWBNO) contractor, Roubion Construction, will be performing a closure which will temporarily disrupt your water services.

WHEN: ***Tuesday, August 18, 2026, from 6:00PM –2:00AM***

WHERE: St Philip St from Bourbon St to Decatur St

When water is restored, run your faucets for 5 minutes to flush out the lines before resuming regular use.

If water is not restored within one hour after end time, please contact us at the email/phone number below.

Gauges will be placed and monitored by a SWBNO crew during the closure. The procedure will be aborted, and the closure opened immediately if there are any unacceptable pressure losses during the closure or if any pressure gauge readings fall to 30psi.

If you are outside of the expected impact area and experience low or no water pressure - or to report a water or sewer emergency anytime - call 504-52-WATER, choose your language option and press 1 for emergency.

About the Project

The replacement of the 24-inch water transmission main in the 900-1100 blocks of Decatur St. from Dumaine to Governor Nicholls Streets and the 600 block of St. Peter St. from Chartres to Royal Street is the seventh **Transmission Water Main Replacement Project** that SWBNO has replaced since 2018. This transmission main program is funded by FEMA and managed by SWBNO in cooperation with the City of New Orleans as part of the Joint Infrastructure Recovery Roads (JIRR) Program.
