Sewerage and Water Board to Perform Test Water Line Closure on 11/18/17, Encourages Residents to Report Changes in Water Pressure

NEW ORLEANS – Sewerage and Water Board of New Orleans (S&WB) will be performing a test closure of a water line at the Carrollton Water Plant this Saturday, November 18th. The closure will be from 4 a.m. to 9 a.m. The purpose of the test closure is in preparation for a valve repair on a 43" water main.

The test will be a controlled closure with pressures closely monitored. S&WB employees will be constantly monitoring water pressure and assessing the impact on any affected areas of the CBD area of New Orleans. However, during the test closure, S&WB is also asking customers to report any changes in water pressure by calling 52-WATER. Should there be drops in water pressure, the controlled test closure can be ended immediately.

The CBD of New Orleans MAY experience changes in water pressure during the test closure.
